

Dear Ladies and Gentlemen,

We are the AAA-Association and together with the colleague of the tourism school of Salzburg are organizing an art& economy event from the 4th to the 7th of November 2021. We are searching for talented artists from Asia, Africa and Austria who focus on interpreting and representing the future environment.

The event will take place in Salzburg, Austria. The art& economic forum aims to create a supportive environment for every participant to discuss about changes and trends in both economy and culture and hopefully gives everyone the chance to connect. Within that event we want to show the effects to the environment in the perspective of an artist. Therefore, we need 3 artists, who deal with that topic and are willing to exhibit and offer some of their art pieces in an auction and most important create live art during the event from those a winner will be selected. Furthermore, they are going to participate in a Q&A session, where the guests of the event are welcome to ask questions to the artists.

The artists will arrive 14 days in advance to get familiar with the surroundings, the event location, the team and receive general information about the procedure and to clarify any open questions. We will provide the artists with the flight ticket, lodging, Visa, and personal space in the event room.

All the money which is generated on the event (auction, sponsoring and ticket sales) will go to 3 selected charity organizations and the winner of the live art competition will receive a prize.

According to the selection of the artists, we need examples of former work, personal data and all sent formulars filled out. The formulars, a questionnaire and all detailed information about the AAA-Association, the event and the overall mission are attached to this email.

We are looking forward to receiving your application and we hope to work with you together on an outstanding event.
